

## School Girls Should Have Immaculate Hands

BY MARGARET E. SANGSTER.

A pretty hand is desired by every girl. What is a pretty hand? I suppose we shall agree that it is one which is white and dimpled, with rosy finger tips, nice nails and small joints. Large, obtrusive knuckles, hands that are too thick and pudgy, or too thin and scrawny to be symmetrical, are not precisely beautiful. But so far as the size and shape of our hands are concerned, we have to take them as they come. We are born with the hands of our ancestry, but the care of the hands is our own, and has far more to do with keeping them beautiful than some people think. I am disposed to the opinion that our hands show character almost as unerringly as our faces do, and I think the manner of using them and the general neatness or slovenliness are apt to be revelations of the inward life.

For instance, there is Amy, a restless, nervous and excitable girl, whose hands are never still a minute when she is awake. She is always clapping and unclapping them, fanning with her hair or her dress, and showing in unmistakable ways that she has no basis of quietude in her own nature. There is Lucy, who cannot sit beside a friend without possessing herself of the friend's hand, squeezing it and fondling it as one strokes a kitten, and near

Lucy sits Fannie, with a yet more objectionable habit of handling everything she sees: objects of art, curios, fans or other delicate things in other people's houses, or in the shops, articles meant to be looked at, but not intended to be touched. Fannie's way is sure to render her persona non grata wherever she goes.

George Eliot, describing Dorothea in Middlemarch, says: "Her hand and wrist were so finely formed that she could wear sleeves not less bare of style than those in which the Blessed Virgin appeared to Italian painters."

If you look at some favorite picture of the Madonna, by Raphael, you will see the sort of hand that Dorothea had. Such hands can be peacefully crossed in one's lap, or, if busy with the pen or the needle, they still retain their feeling of calmness.

"It was all very well for Dorothea to have had those statuesque hands," exclaims Marjorie, "but just fancy that she had been in my case, and had dishes to wash, beds to make, and sometimes pieces to iron. Although I am a schoolgirl I have to help my mother with the housework, and kitchen work spoils a pretty hand." I am aware that many girls think just as Marjorie does about this. I have even known girls who shirked household tasks and allowed tired mothers to grow more tired instead of trying to ease their burdens simply because they feared to ruin hands of which they were vain. You would never do this, I am sure, you girls who are reading this talk.

It is possible that hard daily labor without intervals of rest may coarsen and enlarge a girl's hands, but few of us are exposed to this danger. With a little care, a girl may work in the garden, may sweep, dust, or, if need be, scrub, and may wash dishes three times a day, and not injure her hands in the least. India rubber gloves, fitting tightly to the skin, are a good protection against hot cuds, and dainty dishwashing, which is pre-eminently a lady's work, is greatly helped by the use of a mop. For pots and pans there is an iron dishwasher which is more radical and thorough than a cloth in one's hand. If you are troubled with rough, red or callous hands, if they crack in frosty weather, or the skin peels off, be extremely fastidious about your toilet soap. Wash the hands very thoroughly with soap of good quality. Plunge them in tepid water and be sure to wipe them dry. If hands are always wiped until the moisture is gone and absorbed by the towel, they will seldom crack. The use of cold cream, well rubbed into the skin at night, especially around the finger nails, softens and whitens the hands, and a good plan for a girl is to slip such hands into a loose pair of gloves. An old pair of her father's or brother's gloves answers admirably.

While I am about it, let me caution you not to wear dress gloves too small for you, or that fit too tightly. Instead of making your hand look smaller, tight gloves exaggerate its size. Gloves should be long enough to fit the fingers comfortably, and should come up well over the wrist. I am rather old-fashioned, and do not like to see young girls putting on their gloves in public. One's outdoor toilet should be fully completed before one leaves the house. I know a school where girls receive demerits if they go out to walk or make calls without putting on their gloves first.

Every young girl should have on her dressing table a manicure set. This consists of a small pair of curved scissors, a nail file, an orange stick, a chamade polisher, and a little box of nail sealer. When about to trim the nails, soften them by dipping the ends of the fingers into warm soap water. File the nails first, gently press back the cuticle with an orange stick, rub them with a little vaseline and polish the nails with the chamade. A girl who neglects cleanliness in the daily toilet of the hands and nails is either indifferent to bathing and to the proper care of the body, or else her early surroundings have been unfortunate. Observe, girls, that a lady's hands may be rough or red, but they are invariably immaculate. Clean hands are the hallmark of a gentleman.

Now that I have said all this about beautiful hands, I want to add something else, which is just as important as any of the rest. No hand that is not womanly will ever have a claim to be regarded as charming or exquisite. Womanly hands are those which are engaged in kind offices for those one

loves. The girl who is helpful, unselfish, generous and kind, is the one whose hands will desert most gladly. I must add a word, too, about the cordial hand-clasp. Some girls have a limp, flabby way of shaking hands. They really have no grip. Others go to the opposite extreme, and almost crush a friend's hand when they grasp it. There is a happy medium in this, as in most things. When you meet a friend in the street or at your home, it is very seldom necessary to greet her with a kiss. Almost never should one give a friend another in a public place. The only exception is when friends are separating for a long time or for a journey, such as crossing the Atlantic or the continent. Then kisses are in order. Usually it is enough to shake hands when one encounters friends or acquaintances, and the hand-clasp should be warm and sincere.

Do not rush to fads in handshaking. Several years ago there was a fashion of elevating a friend's hand in a rather abrupt perpendicular way, which had an extremely awkward effect. That style is now obsolete. In your own home do not greet visitors with a mere stiff bow. Offer your hand. You have, of course, the privilege of refusing to shake hands with a person you dislike, or with one of whom you do not approve.

"The hand of Douglas is his own," but one can hardly offer a greater slight than to refuse or overlook a proffered hand.

## AMERICAN ADMINISTRATION'S TUSSELE WITH PHILIPPINE OUTLAWS

Continued from Page 6.

tion owner in the Philippines is being tried for encouraging outlaws. This man owns a principality consisting of many acres of land, upon which there are thousands of employees and countless herds of cattle and carabao. It became known to the authorities that he had given money to the outlaws in that locality. The evidence brought forth at this trial revealed how deep-rooted and pernicious this system has become. This millionaire farmer admitted that it was cheaper to pay the bandits a certain sum not to molest his stock, or people, than to refuse their demands and suffer loss from their depredations. How hopeless is the case of the average poor man when the richest and most powerful citizen in the country is found yielding to the influence of brigandage.

Another case was found where a rich plantation owner had kept a band of outlaws in his employ in order to keep other thieves away from his locality. This after seven years of American rule! Will the reader not agree that the officials deserve much sympathy in their attempt to establish law and order in a country cursed with such systems as these?

Ladronism Must Be Stopped. It should be said once and for all that the continuation of brigandage in the Philippines cannot be charged to American misrule. These uprisings, in-

stead of being revolts against the government, are native quarrels. Although outlaws in the islands was undoubtedly caused by abused natives who had no other way of avenging their wrongs, it has now become an inviting calling for shiftless dare-devils, who are abetted by unscrupulous men of power, some for the sake of plundering the population, others because they have not the courage to resist its demands.

Where the American administration has erred has been in the exercise of too much patience and tolerance. Although this is true, the officials could hardly have done otherwise. Mr. McKinley's mild policy of pacification had to be thoroughly tried. That soft measures cannot suppress the outlaw, and his confederate the boss, is now understood. The strong arm of authority must rescue the serf from bondage, and protect his life and property. There is no use to build and educate by day, if organized cut-throats are allowed to burn and kill by night. Unless the American people can be reconciled to the drastic measures that will be necessary to wipe out ladronism, the success of American rule here will be hindered for years to come.

## He Loves to Trouble Trouble!

(Washington Times.) With Oryana and Linewitch retired from active campaigning, our old friend Russell comes promptly to the fore once more.

## The Original American "Old Moore."

(Detroit Free Press.) However, Mr. Boeschele's remark, number that one Thomas M. Lawson is the only simon-pure panic predictor.

STORE CLOSED MONDAY (JEWISH HOLIDAY).
